

St. Joseph Robotics Team showcase & STEM National Projects! Friday March 9 @ 3PM In the school lobby

Interested in robotics? The St. Joseph's robotics team? Visit us in the school lobby this Friday after school, see some of the robots and possibly even drive one!

This is a great event to see what the school teams have been working on, and especially if you are interested in joining the team next year!

The ExploraVision competition for students engages the next generation in real-world problem solving with a strong emphasis on STEM. ExploraVision challenges students envision and communicate new technology 20 years in the future through collaborative brainstorming and research of current science and technology.

Students can see this year's projects and let us know if you would be interested in joining a team for next year's submission.
